

## AMENDMENTS TO THE CLAIMS

1-7 (Cancelled)

8. (Previously Presented) A cleaning apparatus comprising:
- a plurality of carriers to position and hold a plurality of head gimbal assemblies each with a slider air bearing surface to be polished;
  - a frame to support the plurality of carriers;
  - a cloth strip to be rubbed against the slider air bearing surface;
  - a movable cylinder unit coupled to the plurality of carriers to move the carriers;
  - a polish tank containing cleaning solution to be provided to the movable cylinder unit;
  - a pump to recirculate the cleaning solution; and
  - a filter canister with a filter cartridge to filter the cleaning solution.
9. (Previously Presented) The cleaning apparatus of claim 8, wherein the polish tank is positioned on top of the frame.
10. (Previously Presented) The cleaning apparatus of claim 8, wherein the solution is a detergent.
11. (Previously Presented) The cleaning apparatus of claim 8, further comprising a thermostatically controlled strip heater to heat the solution.
12. (Previously Presented) The cleaning apparatus of claim 8, further comprising a series

of press-pins to press the slider air bearing surface of the head gimbal assemblies into the cloth strip by applying pressure to a flexure of the head gimbal assemblies.

13. (Previously Presented) The cleaning apparatus of claim 8, further comprising a plurality of polish fingers on which the cloth strip is wrapped.

14. (Previously Presented) The cleaning apparatus of claim 8, wherein the cylinder unit is pneumatic.
